WORK EXPERIENCE

Tech One Global
System Administrator

2023 - PRESENT

- I have 1 year of experience with MySQL, where I managed databases and optimized queries for better performance. This role enhanced my skills in data accuracy and efficiency

SKILLS

- Project Management
- Web Development
- Database Management
- Time Management
- Leadership
- Effective Communication
- Critical Thinking

PROJECTS

Constuction Mangement System Web App
MERN Stack

- Built a web app for managing construction projects, including site and employee management, and progress tracking. Utilized the MERN stack for real-time collaboration and scalable data management.

Student Management System
Java & MySQL

- Developed a system to manage student information, attendance, payments, and grades. Streamlined administrative tasks with features like report generation and user authentication.
